

# Volvo I-Shift & Mack M-Drive Controllers

## NOW AVAILABLE WITH EXCHANGE: I-SHIFT AND M-DRIVE CONTROLLERS

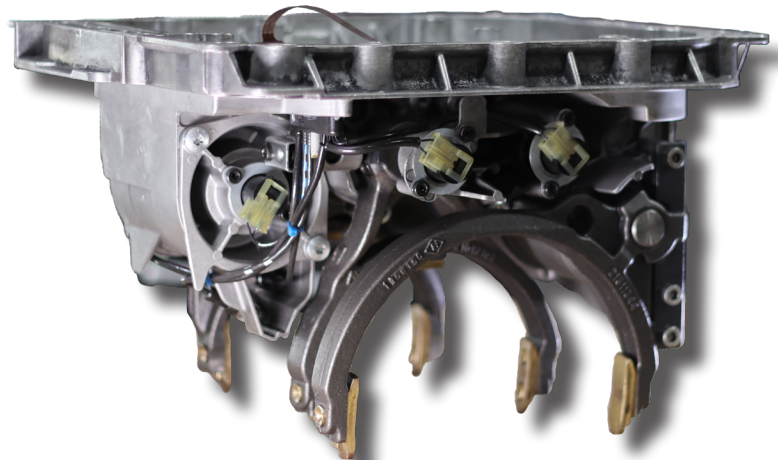

### Get Your Customer Back on the Road—Without Replacing the Entire Transmission

When a Volvo I-Shift or Mack M-Drive transmission controller fails, your customer doesn't necessarily need a complete transmission replacement. Allied Powertrain Group offers remanufactured Volvo I-Shift and Mack M-Drive controllers on an exchange basis, providing repair shops with a cost-effective solution for restoring transmission operation while helping minimize vehicle downtime.

Our remanufactured I-Shift controllers are professionally remanufactured and tested to provide a dependable replacement for failed or faulty controllers. Simply send us your failed controller as the core and receive a replacement controller—a practical solution when the transmission itself is still serviceable.

### A Smarter Alternative to Complete Transmission Replacement

A failed transmission controller can take a truck out of service, but replacing the entire I-Shift transmission may be unnecessary. An exchange I-Shift controller allows repair shops to address the electronic control problem directly, helping reduce repair costs and get the truck back into operation faster.

#### Our Easy Exchange Process:

1. Identify the required I-Shift/M-Drive controller
  - Provide the controller part number and application information to help ensure the correct replacement.
2. Order your remanufactured controller
  - Receive a professionally remanufactured replacement controller ready for installation.
3. Return your failed controller
  - Send your original controller back to Allied Powertrain Group as the exchange core.

### Find Your Correct Controller

| Volvo Transmission Part # | Controller # |
|---------------------------|--------------|
| AT2512C                   | 85027320C    |
| ATO2512C                  | 85027320C    |
| AT2612D                   | 85027320D    |
